Nature conservation and sustainable resource use are integral parts of all island economies

M/Satisfactory ✓

Society Goal

- Pacific Peoples, their governments and institutions are leading activities for the sustainable and equitable use of natural resources in the Pacific region.

Unsatisfactory X

Recommendations

1. Reflect Country Priorities

- Align with NBSAPS
- Strengthen link between Action Strategy, Roundtable & Countries

2. Donors reflect Action Strategy in programmes / projects in Pacific.

- New Initiatives must be integrated with action strategy

3 Broad Objectives

Objective 1: Identify, safeguard and conserve priority sites, habitats and ecosystems

Objective 2: Safeguard and restore indigenous species of ecological or cultural significance, especially those at risk

Objective 3 Manager Priority invasive species, prevent new invasions, and regulate genetically modified organisms

Commitments as Targets

- Remove current targets and replace with commitments from Governments, NGOs and partners.

All Else Remains Same

- Vision, Mission
- 30 Year Goals : Pillars of SD
 - Environment
 - Economy
 - Society
- Principles
 - Community Based Approaches, etc

Focus on Action

- Improving the Process
- Innovative / New Partners
- Real Impacts ...
