A. Background Information on SPREP

SPREP is the regional organisation established by the Governments and Administrations of the Pacific region to protect and manage the environment. It has grown from a small programme attached to the South Pacific Commission (SPC) in the 1980s into the Pacific region’s major intergovernmental organization charged with protecting and managing the environment and natural resources of the Pacific. It is based in Apia, Samoa, with about 60 staff.

SPREP works on behalf of Pacific island Governments and Administrations as the conduit for concerted environmental action at the regional level. The establishment of SPREP also sends a clear signal to the global community of the deep commitment of Pacific island Governments and Administrations to sustainable development, especially in light of the outcomes of the World Summit on Sustainable Development, the Millennium Development Goals, the Barbados Plan of Action and Agenda 21.

The future directions for SPREP are clearly set out in the 2011-2015 SPREP Strategic Plan. This Plan outlines the mandate, vision and programmes for the organisation. The Strategic Plan places strong emphasis on effective delivery of services to SPREP Member countries and territories.

**Mandate**

SPREP’s mandate is to promote cooperation in the Pacific region and provide assistance in order to protect and improve its environment and to ensure sustainable development for present and future generations.

**Vision**

SPREP is guided by its vision for the future: “The Pacific environment, sustaining our livelihoods and natural heritage in harmony with our cultures”.

**Members**

SPREP has 21 Pacific island member countries and territories (American Samoa, Cook Islands, Federated States of Micronesia, Fiji, French Polynesia, Guam, Kiribati, Marshall Islands, Nauru, New Caledonia, Niue, Northern Mariana Islands, Palau, Papua New Guinea, Samoa, Solomon Islands, Tokelau, Tonga, Tuvalu, Vanuatu and Wallis & Futuna) and four developed countries (Australia, France, New Zealand and United States of America) with direct interests in the region.

**Programmes**

The SPREP Strategic Programmes is delivered through two programmes: Island Ecosystems and Pacific Futures. These Programmes are currently responsible for delivery of the 2011-2015 Strategic Plan outcomes in the following areas:

- The Island Ecosystems Programme has lead responsibility for biodiversity and ecosystem management, capacity development, education and social communications, and knowledge management.
- The Pacific Futures Programme has lead responsibility for climate change, waste management and pollution control, environmental monitoring and governance.
- Both Programmes work in an integrated way and will be increasingly involved in joint programme development and implementation.

**GEF Project Background**

SPREP is the GEF Executing Agency on two projects that are expected to commence during 2011: *Prevention, control and management of invasive alien species in the Pacific Islands* (hereafter “Invasives Project”) and *Implementing the Island Biodiversity Programme of Work by integrating the conservation management of island biodiversity* (“Integrated Biodiversity Project”). The first of these
will operate in ten of the member countries of SPREP, and the latter in four, resulting in 12 countries participating in one or both projects. The two projects comprise more than 110 separate activities in the 12 countries.

The Project Facilitator role will assist with the operation of these two highly complex projects, particularly to assist SPREP and participating countries in complying with UNEP and GEF reporting requirements, and to facilitate the operation of the projects.
