

SPREP-Tok

A monthly e-bulletin from the Secretariat of the Pacific Regional Environment Programme

ISSUE 63 • DECEMBER 2019 - JANUARY 2020

MESSAGE FROM MR. KOSI LATU, DIRECTOR GENERAL OF SPREP

Talofa lava and happy 2020 to you all!

The end of 2019 was a whirlwind for the Secretariat, with the preparations leading up to the 25th Conference of the Parties to the United Nations Framework Convention on Climate Change (UNFCCC COP25) and the two-week conference itself in Madrid, Spain being a main focus of our SPREP team, our Members, and the world.

Our SPREP team consisting of experts from the Climate Change Resilience programme provided negotiations support for Pacific Island delegations to COP25. We have continued to work with our island Members over the years, to help amplify the Pacific voice at the world's largest climate change conference.

SPREP also was charged with successfully managing and implementing the Moana Blue Pacific Pavilion, a Pacific partnership supported by New Zealand with Fiji, which provided a dedicated space to showcase the Pacific at COP25. SPREP received commendations from the New Zealand Minister of Environment, Hon. James Shaw, as well as the Honourable Prime Minister of Fiji, Voreqe Bainimarama, for the hard work and effort put into ensuring the Moana Blue Pacific Pavilion was a success.

We are entering the second month of the year, but we already have our work cut out for us. 2020 is shaping up to be yet another busy year, and as we grow at SPREP to provide support to you, our Members for a Resilient Pacific, we look forward to our continued working relationship with you all.

The 10th Pacific Islands Conference on Nature Conservation and Protected Areas will be held in April this year in Noumea and will be co-hosted by the Government of New Caledonia, Pacific Islands Roundtable for Nature Conservation, and SPREP. The 2nd Pacific Islands Environment Leadership Awards will also be held during the conference, to honour those who have shown tremendous leadership in ensuring we promote and maintain a resilient and sustainable Pacific environment.

The 15th meeting of the Conference of the Parties to the Convention on Biological Diversity (CBD COP15) is also expected to be held this year in Kunming, Yunnan, China. The COP15 will review the achievement and delivery of the CBD's Strategic Plan for Biodiversity 2011-2020, which includes the Aichi Biodiversity Targets.

This year is a big year for oceans with the hosting of two big conferences – the UN Oceans Conference in Portugal in June, and the Our Oceans Conference to be held in Palau in August.

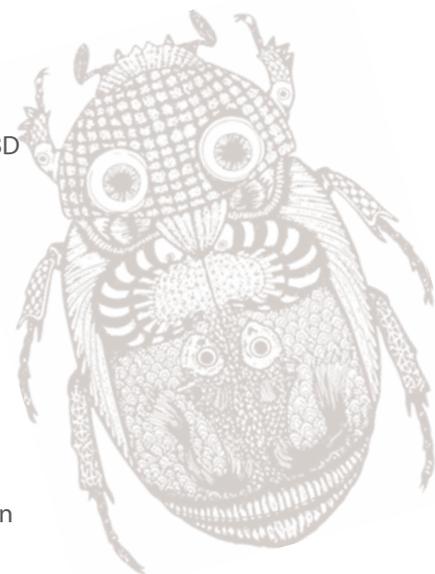

We also have our Third Clean Pacific Roundtable to be held in October this year, a gathering for us to coordinate our waste action as we address our island challenges.

As I've said, we have our work cut out for us this year. While it will be difficult, we can do this together. Through strengthened partnerships with our development partners, and collaboration with our Members whom we serve, we will be able to achieve our vision of a resilient Pacific environment, sustaining our livelihoods and natural heritage in harmony with our culture.

Soifua,

Mr. Kosi Latu, Director General of SPREP.

YOUR VOICE AT THE MOANA BLUE PACIFIC PAVILION

MOANA BLUE PACIFIC PAVILION

“We are responsible for Gods' creations so we must be good stewards of the earth's resources – especially our marine resources.”

SAVE OUR REEFS SO THEY CAN SAVE US!

Annie Rasmussen Semca

“For me the Paris Agreement is about finding a way to cooperate that includes all the countries and ensure fair representation, so that we can hold countries accountable for the emissions they produce and hopefully move into a world that is equitable not only for people but for the species we share the world with.”

1.5 TO KEEP OUR PACIFIC OCEAN ALIVE!

Chloe Bernadette Runsey
New Zealand

MOANA BLUE PACIFIC PAVILION

MOANA BLUE PACIFIC PAVILION

“To put more emphasis on the ocean because we in the Pacific are facing the issue of rising sea levels where people are now being relocated, losing their homes, their sense of identity, their traditions and their culture. So oceans would be the biggest issue I would like the leaders to take into consideration this year.”

KEEP OUR OCEAN CLEAN, CHOOSE TO REUSE!

Komal Kumar
Fiji

“Small island states contribute the least to climate change, yet we are suffering the most as recently experienced with cyclone Maria in Puerto Rico that caused 3057 deaths under the current state of global warming. We need to see more ambition from countries because beyond 1.5 Degrees – many of our islands won't survive.”

I'M AN OCEAN CHAMPION

Isabel Marie Carrion Rodriguez
Puerto Rico

MOANA BLUE PACIFIC PAVILION

“What I would like to see at COP25 is for the big countries, the global North, to mitigate, mitigate, mitigate! And to use renewable energy.”

Carlton Zacharias
Marshall Islands

MOANA BLUE PACIFIC PAVILION

“Climate finance is part of the solution, and it's a main key in mitigation and adaptation. It is not the only solution as there are things we can do every day, changing the way we buy, move, build – but the finance of public strategies is a major requirement to accelerate the movement of innovatio, and adapting to what is already happening because of climate change now.”

Mairia Sage
French Polynesia

MOANA BLUE PACIFIC PAVILION

CLIMATE FINANCE FOR A 1.5°C WORLD
