**Subject: Request for tenders: Environmental and Social Safeguards Specialist to develop Pacific Ecosystem-based adaptation to Climate Change (PEBACC+) Environmental and Social Management Plan, READVERTISEMENT**

---

### **Question 1:**

I would like to clarify if a team of two consultants could be put forward for this position (with shared responsibilities across the deliverables), or if this tender is intended for a sole consultant?

### **Response:**

Teams of consultants can apply and are encouraged.

### **Question 2:**

What is the budget of this assignment?

### **Response:**

Allocated budget is around EUR 30,000.

### **Other relevant information:**

The purpose of the ESIA is to ensure the project implementation and activities (at each of the 12 sites) meets the national requirements of the target countries and are also aligned to the policies and standards of the funding and implementing agencies (AFD and SPREP). The assessment will provide opportunities to strengthen community and stakeholder engagement, identify and mitigate negative impact while identifying opportunities to maximize positive environmental and social benefits.

Project has been rated Category B following SPREP Screening Process, however activity screenings by the respective countries and the risk categorizations may differ and require different types of assessment.
