Subject: Request for tenders (RFT): Implement training and capacity building on seabird monitoring in Palau

Question 1:

Can you please clarify that there is only one component of travel (the workshops in Palau), as the following is stated in the Description of Services: "Collaborate with SPREP to develop a detailed workplan on proposed training and capacity building workshops and data analyses (**face-to-face**)."

This seems to indicate an up-front in-person meeting with SPREP.

But on the final page it states: "The consultant will work remotely prior to the in-country training delivery, with meetings with SPREP to be held online, where necessary and appropriate."

Response:

The detailed workplan to be discussed will be done virtually but the capacity building workshop will have to be in person.
