Subject: Request for tenders: **Supply of Computer Server Equipment for the Inform Project.**

Q1. Please note the tender had requested for a G9 controller P440 which is not supported on a G10 server. The server includes a 12 LFF drive bay and has the option to upgrade to a 2SFF drive cage. It is not upgradable to a 24SFF drive bay system. Higher SFF drive cages are supported only for servers shipped with SFF drive bays

Response:

The drive bays and raid controller specifications will be removed and the tender left more general due to the concerns raised above. They were listed as a possible specification configuration to the required server. The raid controller and drive bays should be included in the tender application for review.
