All the rules of communication and validation circuit are given in this document.

This manual is also a tool to ensure the visibility of donors and partners of the Kiwa Initiative.

Please note that Agence Française de Développement (AFD), through the Kiwa Initiative Secretariat, reserves the right to control any communication action to ensure the visibility of all donors.

Any enquiry or question concerning this document has to be sent to:

Communication guidelines

1. USE OF THE KIWA INITIATIVE LOGO

The significance of the Kiwa Initiative logo.

The circular shape in the logo promotes the pooling of resources for an important impact. The elements that compose the circle, symbol of the Earth, evoke the protection (hands) of all the biodiversity of the Pacific Islands (the terrestrial biodiversity represented by the green color and the marine biodiversity by the blue color).

The preferred logo is the one including the signature “Nature-based Solutions for climate resilience”. It must not be distorted and should not use colors other than those defined in the Kiwa Initiative graphic charter (provided in the community space). The Initiative logo may be used without the baseline when it is too small to be understood. The size of the logo should not be less than 3 mm wide.

The logo should be used in:

- COLORS: when the background is white.
- GREY: when used in black and white documents (letters, etc.).
- WHITE: when the background is dark or in colors (images, pictures, video), or solid-colors.

Communication guidelines

1. USE OF THE KIWA INITIATIVE LOGO

Logo positioning: The logo should be positioned on the right side and preferably at the top of the print corporate and event documents.

The logo should be positioned at the top left side of the digital images and other documents.

Source: These logos are available under .png and .ai formats and downloadable in the community space.

Visibility on project sites:

- During the lifespan of the project, information panels will contain the usual information, i.e., the Kiwa Initiative logo, the donors logos, the logos of the partners (SPC, SPREP, IUCN), the name of the project leader and a brief explanation of the work in progress.
- Once the work is completed, these panels will be removed and replaced by permanent signage such as a plaque with the words: "This [include the exact title] was funded by the European Union (EU), Agence Française de Développement (AFD), Global Affairs Canada (GAC), Australian Government Department of Foreign Affairs and Trade (DFAT) and New Zealand Ministry of Foreign Affairs and Trade (MFAT) within the framework of the Kiwa Initiative, in [year]."
- The logos of donors and partners should appear in all materials produced.

3. PRODUCTION OF VIDEOS AND PHOTOGRAPHS

All videos produced to promote the Kiwa Initiative will be available for use by all the Kiwa Initiative community (donors, PICTs representatives, partners, grantees, project leaders, Secretariat). The Kiwa Initiative, donor and partner logos must appear in any video produced by and for the Kiwa Initiative. Such video material will be made available to donors and partners free of royalties.

The videos will be produced in English or French with subtitles in the second (not spoken) language.

The donors are the joint owners of all photographs and video rushes produced under the Kiwa Initiative. In the framework of a project, the project beneficiary will be co-owner of the produced material. The Secretariat compiles and holds all materials. No modification of a completed video will be permitted.

The people featured in the videos must have previously signed an authorization for the use of their image. For the children featured in the videos, a signature of the legal guardian authorizing the use of image must be signed. These documents can be requested at any time by the Secretariat.

- The following words should appear:

"This video/production was made with the financial support of the European Union, Agence Française de Développement, Global Affairs Canada, Australian Department of Foreign Affairs and Trade and New Zealand Ministry of Foreign Affairs and Trade within the framework of the Kiwa Initiative."

"Its content is the sole responsibility of [XXXX] and does not reflect the views of the donors."

Communication guidelines

3. PRODUCTION OF VIDEOS AND PHOTOGRAPHS

For the local projects managed by IUCN, the following responsibility clause will be included at the end of all videos produced by IUCN:

“The content of this video is the sole responsibility of IUCN and does not necessarily reflect the views of the donors.”

Use of the Kiwa Initiative logo when the video is produced by a donor or a partner:

- The Kiwa Initiative logo must be used on the first image of the video and on the end shots ;
- It should appear in its white version if positioned directly on the images or in color if included on a headband (see paragraph 2).

On the end shots, should appear:

- The logos of the donors and partners;
- The link to the Kiwa Initiative website (www.kiwainitiative.org) and Kiwa Initiative social networks (Facebook, Twitter and LinkedIn, ...).

Any video produced as part of the Kiwa Initiative's communication can be used by the Initiative without financial consideration in its own communication channels (website, social networks, events).

Communication guidelines

3. PRODUCTION OF VIDEOS AND PHOTOGRAPHS

Photographic material produced by the Kiwa Initiative will be available to donors and partners free of royalties.

Kiwa Initiative visibility

- Photos produced as part of the Kiwa Initiative should give credit to the photographer as well as to the Initiative:

Photographer's name © Kiwa Initiative - date

- Any photo produced by partners or donors as part of the Kiwa Initiative actions should be negotiated with the photographers in order to be used by the Initiative without financial consideration in its own communication channels (website, social networks, events).
- **Apart from the Kiwa Initiative's own communication channels, all photos used should mention the Kiwa Initiative and photographer credit** (see above).

The Kiwa communication storytelling

The choice of the Kiwa Initiative is to focus on the human benefits of Nature-based Solutions (NbS) in order to facilitate their appropriation. Thus, the photos should focus more on the balance between human and nature, especially by highlighting the use of NbS by a human. For example, the image of a coastal fisherman will be preferred to that of a healthy reef, the image of reforestation efforts will be preferred to the image of a forest.

Example: illustration of a project focusing on resilience of coastal communities:
