

REQUEST FOR TENDERS

RFT: 2021/056_ReAd
File: AP_4/12/19/1
Date: 27 August 2021
To: Interested suppliers
From: Dr Gregory Barbara, Environmental Assessment and Planning Officer

Subject: Request for tenders: Development of Guidance Note for Forestry Sector Logging Operations Good Practice in Impact Assessment as Addendum to 2016 Strengthening Environmental Assessment Guidelines for Pacific Island Countries and Territories, READVERTISEMENT.

1. Background

- 1.1. The Secretariat of the Pacific Regional Environment Programme (SPREP) is an intergovernmental organisation charged with promoting cooperation among Pacific islands countries and territories to protect and improve their environment and ensure sustainable development.
- 1.2. SPREP approaches the environmental challenges faced by the Pacific guided by four simple Values. These values guide all aspects of our work:
 - We value the Environment
 - We value our People
 - We value high quality and targeted Service Delivery
 - We value Integrity
- 1.3. For more information, see: www.sprep.org.

2. Specifications: statement of requirement

- 2.1. SPREP would like to call for tenders from qualified and experienced impact assessment consultants. who can offer their services to SPREP in developing a regional guidance note on the forestry sector good practice for impact assessment. The guidance note would contain proper guidelines for mitigating impacts from forestry operations with clear examples to illustrate the required process in determining and calculating offset areas or environmental bonds within the context of the EIA process.
- 2.2. The successful applicant will need to provide the details of works required as referred to in the attached Terms of Reference within 8 months of the consultancy start date.
- 2.3. Due to the pandemic travel restrictions the work is to be completed remotely, and no travel is expected during the consultancy.
- 2.4. The Terms of Reference and the Specific Duties of the Contractor are set out in Attachment "A".
- 2.5. The successful consultant must supply the services to the extent applicable, in compliance with SPREP's Values and Code of Conduct. https://www.sprep.org/attachments/Publications/Corporate_Documents/sprep-organisational-values-code-of-conduct.pdf

3. Conditions: information for applicants

- 3.1. To be considered for this tender, interested applicants must meet the following conditions and criteria:
- a) A Bachelor's degree in Environmental Science or related field of relevance with a minimum of seven years' experience in impact assessment, or natural resources management with a focus on coastal projects. A post graduate degree is an advantage.
 - b) Submission for consultancy should include a technical and a financial proposal.
 - c) Submit a CV to demonstrate the consultant has the relevant experience, skills and qualifications to carry out this contract successfully.
 - d) Provide examples of prior relevant work outputs.
 - e) Complete the **tender application form** provided (*please note you are required to complete in full all areas requested in the Form, particularly the Statements to demonstrate you meet the selection criteria – DO NOT refer us to your CV or your Technical Proposal. Failure to do this will mean your application will **not** be considered*) and
 - f) Sign the **Conflict-of-Interest** form.

4. Submission guidelines

- 4.1. Tender documentation should demonstrate that the interested consultant satisfies the conditions stated above and can meet the required specifications and timeframes. Documentation must also include supporting examples to address the evaluation criteria.
- 4.2. Tender documentation should comprise the interested supplier's complete proposal, comprising:
 - a) CV of all the proposed personnel highlighting experience relevant to the tender. Also submit details of relevant experience as a consultant, subcontractor or management consultant under contracts with similar services.
 - b) Technical Proposal/Methodology which contains the details to achieve the tasks outlined in the Terms of Reference, including a draft communications plan due to the requirement for remote delivery
 - c) Financial Proposal - detailed outline of the costs involved in successfully delivering this project. Please note that all costs, including taxes, facilities, insurance, and travel and associated costs should be included in the financial proposal. Submitted proposals will be evaluated based on best value for money.
- 4.3. Provide at least 3 referees relevant to this tender submission, including the most recent work completed.
- 4.4. Tender submission must be in United State Dollars (**USD**).
- 4.5. The Proposal must remain valid for 90 days from date of submission.
- 4.6. Interested consultants must insist on an acknowledgement of receipt of the proposal.

5. Tender Clarification

- 5.1. Any clarification questions from applicants must be submitted by email to procurement@sprep.org before **17 September 2021**. A summary of all questions received with an associated response will be posted on the SPREP website www.sprep.org/tender by **21 September 2021**.

6. Evaluation criteria

- 6.1. SPREP will select a preferred consultant on the basis of SPREP's evaluation of the extent to which the documentation demonstrates that the tenderer offers the best value for money, and that the tenderer satisfies the following criteria:

Criteria	Description	Weighting (%)
Experience	Minimum BSc level qualifications in environmental science or related field and more than 7years' experience working in areas of environmental impact assessment, environmental management, and coastal natural resource management	10
	Proven experience in developing impact assessment practice notes or guidelines recognized at either sector level, nationally or internationally	10
	Demonstrated experience in developing or using environmental bonds and calculate offset areas for vegetation clearance	10
	Well versed in multi-lateral environmental agreements including regional and international commitments (such as SDGs), as well as familiarity with Regional Goals and national development plans from the Pacific	10
	Proven experience in project management and ability to deliver within the timeframe	10
	Proficiency in English (oral and written) with demonstrated high-level skills in drafting, reviewing, and writing reports	10
	Demonstrated experience working in the Pacific region or other developing countries Excellent communication and inter-personal skills, willing to work alongside colleagues from different professional backgrounds, sensitivity to cultural differences and willing to build and strengthen capacity of government officers.	15
	Technical Proposal/ Methodology	Detailed technical proposal/workplan, methodology and schedule of activities
Financial proposal	Detailed financial proposal in US dollars	10

7. Deadline

- 7.1. **The due date for submission of the tender is: 29 September 2021, midnight (Apia, Samoa local time).**
- 7.2. Late submissions will be returned unopened to the sender.
- 7.3 Please send all tenders clearly marked '**RFT 2021/056_ReAd: Development of Guidance Note for Forestry Sector Logging Operations, Readvertisement**' to one of the following methods:

Mail: SPREP
Attention: Procurement Officer
PO Box 240
Apia, SAMOA

Email: tenders@sprep.org (MOST PREFERRED OPTION)

Fax: 685 20231

Person: Submit by hand in the tenders box at SPREP reception,
Vailima, Samoa.

Note: Submissions made to the incorrect portal will not be considered by SPREP. If SPREP is made aware of the error in submission prior to the deadline, the applicant will be advised to resubmit their application to the correct portal. However, if SPREP is not made aware of the error in submission until after the deadline, then the application is considered late and will be returned unopened to the sender.

SPREP reserves the right to reject any or all tenders and the lowest or any tender will not necessarily be accepted.

For any complaints regarding the Secretariat's tenders please refer to the Complaints section on the SPREP website

<http://www.sprep.org/accountability/complaints>

TERMS OF REFERENCE

Development of Guidance Note for Forestry Sector Logging Operations Good Practice in Impact Assessment as Addendum to 2016 Strengthening Environmental Impact Assessment Guidelines for Pacific Island Countries and Territories

BACKGROUND:

The SPREP Strategic Plan 2017-2026 regional goal 4 stated that Pacific people and their environment benefit from commitment to and best practice of environmental governance. SPREP plays a key role in assisting countries to develop capacities in environment governance and one this is delivery through the program of environment impact assessment training. An objective under this regional goal is for SPREP to strengthen national sustainable development planning and implementation systems including through use of Environmental Impact Assessments, Strategic Environmental Assessments, and spatial planning.

The above is also in line with the European Union initiated capacity building project titled "Capacity Building related to Multilateral Environmental Agreements (MEAs) in African, Caribbean and Pacific (ACP) Countries", implemented by UNEP, and known as the ACP MEAs Project. SPREP through the Environmental Monitoring and Governance (EMG) Programme is assisting the 21 SPREP Member Pacific Island countries and territories (PICTs) in strengthening national MEA enforcement and compliance mechanisms, through Environmental Impact Assessment (EIA) and Strategic Environmental Assessment (SEA).

The 27th Annual SPREP Meeting in 2016 endorsed the regional guidelines "Strengthening Environmental Impact Assessment; Guidelines for Pacific Island countries and territories" hereby referred to as the "2016 Regional EIA Guidelines". The 2016 Regional EIA Guidelines have been effectively used and has facilitated improvements in EIA processes, its management and awareness within PICTs.

The 2016 Regional EIA Guidelines, provides a general and broad description of potential projects and impacts that can be addressed through the EIA process to promote a general awareness of the EIA tools including environmental bonds amongst SPREP member countries. While the 2016 Regional EIA Guidelines discuss the application of environmental or security bonds and mention of sector specific impacts there is no focus on mitigation planning for sectors such as Forestry nor is there existing regional guidance for environmental bonds or offset calculations to progress this part of the work.

OBJECTIVES:

SPREP is now seeking the services of a specialist on a short-term consultancy to develop and produce a regional guidance note as an addendum for the 2016 Regional EIA Guidelines as a tool for mitigation, planning and decision making for vegetation clearance and logging related to Forestry.

The second part of the work is to prepare and develop a guidance note on environmental bonds and template for offset calculations for vegetation clearance which would form part of the regional EIA guidance note for Forestry commercial timber harvesting and vegetation clearance. The guidance note would contain sector relevant guidance and example formula to calculate the required bonds for vegetation clearance and forestry projects with clear examples (case studies) to illustrate the required process in determining and calculating environmental bonds within the context of the EIA process in the Pacific Islands.

SCOPE OF WORK:

1. The scope of work covers the following tasks:

The consultant will be required to undertake the following. The consultant will be required to hold inception workshop with SPREP to agree upon the final scope of works and communication plan.

Key duties of the consultancy include:

Development of an environmental impact assessment and mitigation guidance note for logging operations and vegetation clearance related to the Forestry Sector for Pacific island countries and territories. The guidance note should be developed based on best practices and draw upon existing national or regional codes of practice and should be relevant and appropriate to the Pacific context. It must also be aligned to and build upon the existing **2016 Strengthening Environmental Impact Assessment Guidelines for Pacific Island Countries and Territories**. It should contain at least the following key elements:

Task 1	<ul style="list-style-type: none"> a) Definition of key terms b) Brief background of the Forestry industry and application of EIA in the Pacific Islands region, citing relevant legislation for the region
Task 2	Consideration and recommendation for effective environment impact assessment for the Forestry Sector logging operations.
Task 3	Use case studies on applying EIA in the Forestry sector to detail examples of effective environmental management strategies, preferably drawing on PICT examples, if not then topographically and climatically comparable case studies to the Pacific Islands Forestry sector.
Task 4	Environment Monitoring and Management Plan (EMMP) Toolkit/template with tips and tools developed including flow charts/diagrams to illustrate the process for designing a relevant and effective EMMP for logging operations in line with existing codes of logging practice for at least one or two Pacific Island countries and territories. The toolkit/template should be user friendly and easy to use to support on-going EIA training activities in the Pacific Islands Region
Task 5	Facilitate a peer review process to seek feedback from experts and practitioners including input from relevant government officials and stakeholders on drafting of the guidance note.

2. Develop a guidance note and toolkit/template on Environmental Bonds. It should contain calculation formula and a process for developing a bond or vegetation offset clearance to assist member countries in calculating environmental bonds/offset valuation for Forestry and projects that require vegetation clearance using the Environment Impact Assessment process. The guidance note should contain at least the following key elements:

- a. Definition of an environmental bond that should address what is an Environmental Bond and why is it applied in the Environment Impact Assessment process.
- b. The guiding formula to be used which can be easily understood and applied by SPREP member countries.

- c. Types of Forestry and projects involving greenfield vegetation clearance where environmental bonds could be applied
- d. Provide examples or case studies of how the formula has been used on specific Forestry or vegetation clearance projects.
- e. Provide examples of legislation and policies in PICTs where environmental bonds are required and make recommendations on the integration/inclusion of environmental bonds if not covered in existing legislation and policies.
- f. The guidance note should contain flow diagrams that will be easier to follow with necessary narratives to support it.

In carrying out the expected duties outlined above, the consultant will be required to work in close consultation with key staff of SPREP and will be required to contact key technical focal points in PICTs for input as well as seeking input and advice from partners.

Key Outputs by the Consultant:

The following are key outputs to be produced and delivered by the consultant:

1. Strengthening Environmental Assessments for logging and vegetation clearance applications in the Forestry sector – Guidance notes for Pacific Island Countries and Territories including the Toolkit/template for developing appropriate EMMP to support code of logging practices for Forestry.
2. A Guidance Note on calculation of Environmental Bonds for Forestry and vegetation clearance projects for PICTs including clear processes and formula for calculating environmental bonds or offset valuation as part of the Environment Impact Assessment process.

The consultant will be required to present the final outputs to the EMG team and key SPREP staff.

Information for Applicants:

- Due to COVID travel restrictions, there is no travel expected during the consultancy. All meetings and attendance of workshops will be via virtual collaboration platforms.
- SPREP will provide technical support and guidance to the consultants as required.
- The successful consultant will be guided by SPREP on the drafting of the guidance note(s). All these sessions will be virtual.
- The successful consultant must supply the services to the extent applicable, in compliance with SPREP's Values and Code of Conduct.
https://www.sprep.org/attachments/Publications/Corporate_Documents/sprep-organisational-values-code-of-conduct.pdf

TIMEFRAME

All activities are to be completed no later than 8 months from the consultancy start date.

REPORTING

The Consultant will report to Dr. Gregory Barbara, Environmental Assessment and Planning Officer of Environment Monitoring and Governance Program, SPREP.
